Lab tests - Blood (Blood)

Kelly Troiano Buckman, MD 11/22/2023, 7:37 AM

Hi, Nirali,

Your ferritin (iron) is a little low, although you are not anemic. I will send a prescription for iron pills to your pharmacy on file. The other labs are normal. The low alkaline phosphatase is not clinically significant. Your screen for mononucleosis was negative, though the more sensitive and specific titers are still pending.

Best,

Kelly Troiano Buckman, MD
